Vishnu Kannampattuparambil Vinod

Software Engineer | Android & Point-of-Sale | 5 Years Experience

+1 469-380-9669 · vishnuviez@gmail.com · linkedin.com/in/vishnuviez · Plano, TX 75024

SUMMARY

Software engineer with 5 years of production experience building Android and point-of-sale applications in Java and Kotlin — including PAX terminal hardware integration, barcode/QR payment flows, and merchant-facing feature delivery. Proven track record of end-to-end ownership: architecture design, REST API integration, release management, and post-release monitoring. Currently building applied AI skills through the IBM SkillsBuild AI program, working with RAG pipelines, LangChain, LangGraph, and vector databases. M.S. Computer Engineering candidate at UT Dallas.

TECHNICAL SKILLS

Languages: Java, Kotlin, Dart, XML, SQL

AI / ML: RAG (retrieval-augmented generation), LangChain, LangGraph, vector databases and embeddings, semantic search, LLM integration, prompt engineering, agentic workflows, NLP, neural networks, search algorithms (A*, BFS)

Mobile & POS: Native Android, Flutter, PAX terminal hardware, merchant POS SDK

Payments: Barcode/QR scanning (EAN, ITF, UPC, QR), transaction flows, payment gateway integration

Architecture: MVVM, MVC, MVP, Clean Architecture, BLoC, modular design

APIs & Services: RESTful APIs, Retrofit, JSON, Firebase (Crashlytics, FCM, Analytics)

Databases: SQLite, Firebase Firestore, vector stores

DevOps & Tools: Git, JIRA, CI/CD, ProGuard, Agile/Scrum, sprint planning

Practices: TDD, code review, peer mentoring, release management, L3 support, app signing, secure API auth headers

PROFESSIONAL EXPERIENCE

CronJ IT Technologies — Software Engineer (Mobile) — SDE-2 | Feb 2023 – Dec 2024 | Bangalore, India

- Led feature delivery end-to-end across multi-platform Android applications — from requirements and technical design through production release and post-release defect management.
- Improved application performance by 30% by profiling and refactoring data-binding and view-binding paths across multiple modules; applied Clean Architecture principles to reduce technical debt.
- Owned the full release pipeline — build signing, staged rollouts, hotfixes — ensuring compliance with Google Play Store versioning, signing, and deployment standards.
- Built and monitored production observability using Firebase Crashlytics and Analytics; triaged live defects from real-user telemetry, reducing mean time to resolution.
- Mentored junior engineers through peer code reviews, guided architectural improvements, and drove adoption of CI/CD best practices across the team.

Aroha Technologies Pvt Ltd. — Software Engineer | Dec 2021 – Nov 2022 | Bangalore, India

Stack: Java, Kotlin, XML, Retrofit, MVVM, Firebase, Native Android, PAX Terminal SDK

- Developed point-of-sale features on PAX payment terminal hardware — integrated device SDK, handled transaction flows, and worked within embedded hardware constraints for a merchant payments product.
- Implemented barcode and QR payment scanning (EAN, ITF, UPC, QR) via play-services-vision, directly supporting merchant checkout and payment acceptance workflows.
- Integrated REST APIs using Retrofit — handling request/response serialization, authentication headers, retry logic, and error states for secure payment data flows.
- Built multiple production modules in Java on MVVM architecture with clean separation of presentation, business logic, and data layers into independently testable units.
- Designed reusable UI components from wireframes, reducing duplicated code and improving render performance across repeated merchant-facing screens.

Infount – The Source of IT Solutions — Software Engineer | Jun 2019 – Aug 2021 | Bangalore, India

- Designed and delivered client-facing Android applications; assessed technical feasibility of proposed features before committing to implementation.
- Maintained, debugged, and shipped updates across multiple concurrent Java/Android projects; participated in sprint planning and story estimation in an Agile environment.

EDUCATION & CERTIFICATIONS

M.S. Computer Engineering — University of Texas at Dallas | In Progress

B.C.A. Computer Applications — Koshys Institute of Management Studies | GPA 7.72 / 10

Certifications: IBM SkillsBuild — Artificial Intelligence (In Progress) · AWS · Cloud Computing · Linux Administration

Work Authorization: F-1 — CPT eligible now, OPT upon graduation | Plano, TX (open to relocation)
